

MEMORIE DELLA SOCIETÀ ASTRONOMICA ITALIANA

Vol.83 n.3 2012

**QSO astrophysics, fundamental physics, and astrometric  
cosmology in the Gaia era**

*Porto-Portugal, June 6-9, 2011*

*editors:* Editors: S. Anton, M. Crosta, M.G. Lattanzi and A. Andrei

**TABLE OF CONTENTS**

<i>Index</i>	901
<i>Foreword</i>	904
<i>Preface</i>	907
<i>List of Participants</i>	908
<b>Session: QSO astrometry in the context of observational astrophysics</b>	
N. Bartel <i>Probing astrophysics, celestial reference frames, and general relativity</i>	911
F. Mignard <i>QSO observations with Gaia: principles and applications</i>	918
I. Browne <i>AGN astrophysics from comparing radio and Gaia optical astrometry</i>	925
A. Andrei <i>Gaia initial QSO catalogue: the variability and compactness indexes</i>	930
S. Anton <i>Photocenter variability and AGN components</i>	934
J. Roland <i>Binary black holes in nuclei of extragalactic radio sources</i>	940
F. Finet <i>Detection of bright multiply imaged quasars with Gaia</i>	944
B. Rocca-Volmerange <i>Radio galaxies with Gaia: the starburst-AGN duality</i>	948

**Session: QSO and the reference frame**

V. Makarov		
	<i>Quasometry, its use and purpose</i>	952
P. Charlot		
	<i>The ICRF now and in the future</i>	959
G. Bourda		
	<i>Towards an accurate alignment of the VLBI frame and the future Gaia optical frame – VLBI observations of weak extragalactic radio sources: status and future plans</i>	966
R. Porcas		
	<i>Effect of core-shifts on VLBI group-delays</i>	970
I. Sotuela		
	<i>The contribution of X/Ka-band VLBI to multi-wavelength celestial frame studies</i>	974
T. Jung		
	<i>Recent VLBI activities at the Korean VLBI network</i>	978
J. Souchay		
	<i>The Large Quasar Astrometric Catalog (LQAC) : principle and construction</i>	980
F. Tavis		
	<i>Optical observations of QSOs for the link of reference systems</i>	986
S. Frey & G. Orosz		
	<i>Radio–optical outlier quasars – a case study with ICRF2 and SDSS</i>	990

**Session: Reference Frame and the fabric of Space-Time**

S. Klioner		
	<i>Astronomical relativistic reference systems and their application for astrometry</i>	994
S. Kopeikin		
	<i>Astrometric reference frames in the solar system and beyond</i>	1001
D. Bini		
	<i>Special frames in general relativity: applications to the IPN approximation</i>	1008
F. deFelice		
	<i>Physical measurements in general relativity: a new effect</i>	1014
M. Ruggiero		
	<i>Using ring laser systems to measure gravitomagnetic effects on Earth</i>	1017
S. Bertone		
	<i>Light deflection for relativistic space astrometry in closed form</i>	1020
P. Teyssandier		
	<i>Time transfer function in static, spherically symmetric space-times</i>	1024

- M. Crosta  
*Physics and coordinates in competition in highly accurate measurements* 1028

**Session: Astrometric cosmology**

- M, Lattanzi  
*Astrometric cosmology* 1033
- U. Abbas  
*From LSS to the Milky Way Halo* 1048
- S. Capozziello  
*Dark energy and dark matter as curvature effects* 1054
- J. Paramos  
*Testing a non-minimal coupling between matter and curvature* 1062
- A. Vecchiato  
*Putting Einstein to test. Astrometric experiments in fundamental physics* 1073
- M. Gai  
*Gravitation Astrometric Measurement Experiment* 1077

**Epistemology implications of current theories of the Universe**

- O. Bertolami  
*What if ... general relativity is not the theory?* 1081
