

**Attività di Studio per la comunità scientifica nazionale  
Sole, Sistema solare e Esopianeti**

*editors:* Francesca Esposito, Raffaele Mugnuolo, Eleonora Ammannito

**TABLE OF CONTENTS**

<i>Index</i>	5
<i>Index</i>	6
<i>Foreword</i>	7
Viti	
<i>Understanding the molecular gas in external galaxies</i>	15
Colzi et al.	
<i>Astrochemistry on Galactic scales</i>	23
Bianchi et al.	
<i>Molecular complexity of young solar analogues</i>	32
Perotti et al.	
<i>Planet Formation and Disk Chemistry. Dust and gas evolution during planet formation</i>	41
Poggiali et al.	
<i>The chemical composition of Solar System objects</i>	50
Ioppolo et al.	
<i>Laboratory Astrochemistry</i>	60
Campisi et al.	
<i>Computational Astrochemistry. Journey towards the molecular universe</i>	69
Tonolo & Alessandrini	
<i>Ab initio Calculations for Astrochemistry</i>	77
Guilluy et al.	
<i>Observations of exoplanets and their atmospheres</i>	85
Modirrousta-Galian et al.	
<i>Windows Into Other Worlds. Pitfalls in the physical interpretation of exoplanet atmospheric spectroscopy</i>	93
Codella et al.	
<i>The chemistry of star and planet formation with SKA</i>	101
